Introduction

Conducting operations in the mining sector requires substantial investment. However, enterprises in the sector face investment shortages. Therefore, in order to support their operations, this compilation has been prepared by consolidating information on projects.

General information

As of the end of 2024, total of 1759 mineral mining licenses held by 1216 enterprises were registered in the cadastral registration system of Mineral Resources and Petroleum Authority of Mongolia. Among them, 689 enterprises reported to the Mining Division of the Mineral Resources and Petroleum Authority of Mongolia that they had not carried out operations on 956 licensed mining areas. Based on the reported reasons for inactivity, 425 enterprises were unable to conduct mining operations on 538 licensed areas due to a lack of investment.

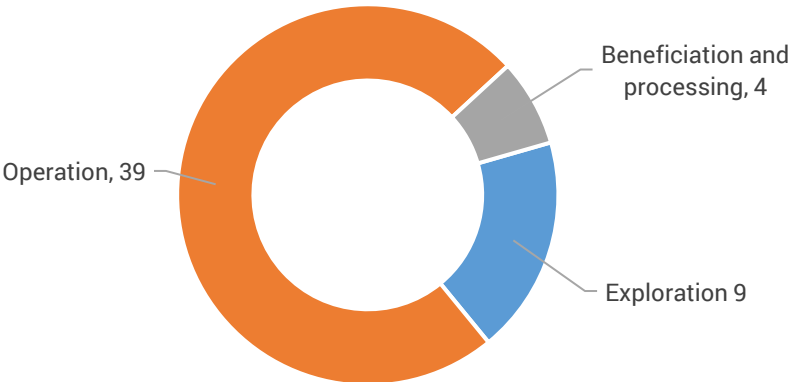

Of these, 47 enterprises submitted information on 52 projects that require investment. The total investment needed for these projects is estimated at MNT 4 trillion.

Projects	52
Enterprises	47
Seeking Investment	4 trillion MNT

Among these projects, 9 are focused on exploration, resource assessment, and increasing reserve quantities; 39 aim to carry out mining operations and bring deposits into economic circulation; and 4 are intended to establish processing and beneficiation plants to produce value-added products.

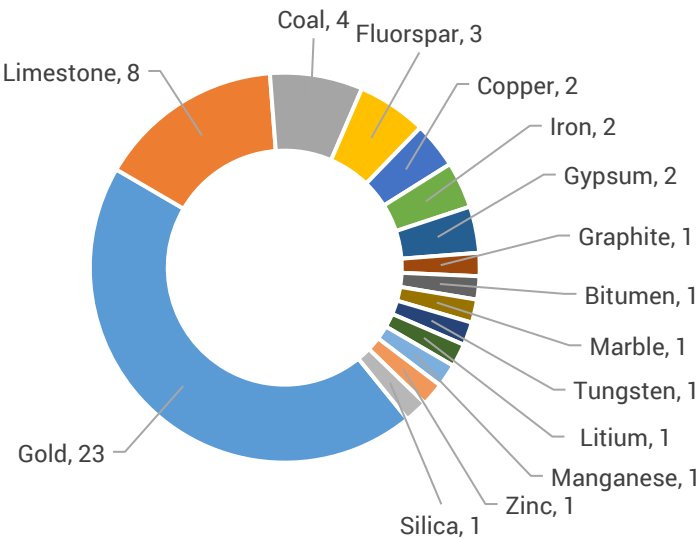

Types of Project

By type of mineral, the project consists of 23 in gold, 8 in limestone, 4 in coal, 3 in fluorspar, 2 each in copper, iron, gypsum, and 1 project each in graphite, bitumen, marble, tungsten, lithium, manganese, zinc, silica requiring investment.

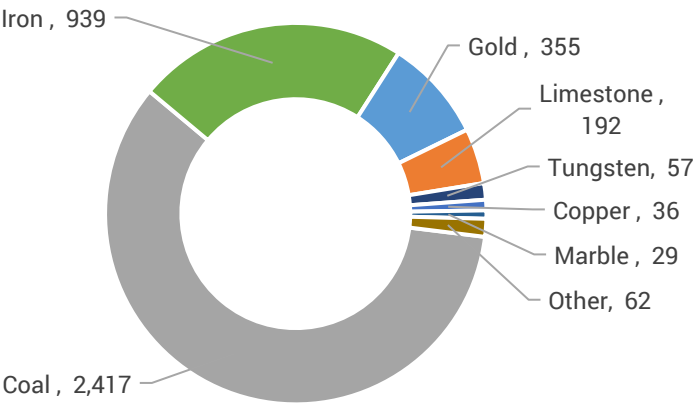

Type of Mineral

Considering the required investment amount by type of mineral, coal projects need 2.4 trillion MNT, iron projects require 939 billion MNT, gold projects 355 billion MNT, limestone projects 192 billion MNT, tungsten projects 57 billion MNT, copper projects 36 billion MNT, graphite projects 29 billion MNT, and other types of mineral projects need 62 billion MNT.

Investment Amount /billion MNT/

EXPLORATION PROJECTS

CHANDMANI

Mineral	Primary gold deposit
Owner	Agibuyant LLC
License number	MV-022150
Location	Umnugovi province, Manlai soum.
Resources, Reserve	

Category	Classification	Ore		Metal/Element	
Resource	P	Gold, Polymetal	25 million tons	Gold	6.1 tons
		Graphite	38.5 million tons	Silver	200 tons
Reserve	C	Ore	3.2 million tons	Graphite	2.5 million tons
				Gold	335 kg
				Silver	13.7 tons

General information

Deposit type	Porphyry
Age of license	Valid until 2052
State-funded geological exploration	200.000 recon mapping
Geophysical surveys conducted	200 hectare area magnetic & electrical at a depth 300 m
Geological mapping conducted	1:5000

Main information

Mining and drilling works conducted	4673 length.m diamond drilling 527 m ³ trench
Laboratory analyses conducted	Gold, Polymetal -5117 Graphite-55
Expenditure incurred for exploration	1.2 billion ₮
Invested capital	1.2 billion ₮
Seeking investment	9.3 billion ₮
Investment form	JV
Geology and exploration work plan	Drilling 7.000 -10.000 length.m 5000-7000 Lab analysis

Project Brief	click here to find out more

DELGEREKHTSAGAAN

Mineral Primary gold deposit
Owner Caimex LLC
License number MV-021755
Location Dundgovi province, Tsagaandelger soum.
Resource, Reserve

Category	Classification	Ore	Metal
Reserve	B+C	4.7 Million ton	Gold 1,028.5 kg Silver 13.1 ton

General information

Deposit type	Primary epithermal gold and silver
Age of license	2051
State-funded geological exploration	1:50,000 geological mapping and prospecting B-0-1 lead-antimony exploration
Geophysical surveys conducted	Magnetic Survey, IP survey, IP sections
Geological mapping conducted	Detailed geological mapping

Main information

Mining and drilling works conducted	5,927.6 linear m of drilling works, 52.85 m ³ of trench, 30 trenches, and 2,325 core samples
Laboratory analyses conducted	Geochemical sampling – 4,054; core samples; two technological samples: primary ore and oxidized ore
Expenditure incurred for exploration	1.86 Billion ₮
Invested capital	3.2 Billion ₮
Seeking investment	5 Billion ₮
Investment form	JV, Sale and other
Geology and exploration work plan	Increase reserve

TSUVRAA TSAGAAN TOLGOI

Mineral Primary gold deposit
Owner Newgold Mine LLC
License number MV-021925
Location Umnugovi province, Manlai Soum
Resource, Reserve

Category	Classification	Ore	Metal
Resource	P		Gold 648.1 kg
Reserve	B+C	1.1 million ton	Gold 394.6 kg

General information

Deposit type	Vein type
Age of license	Valid until 2051
State-funded geological exploration	N/A
Geophysical surveys conducted	Magnetic Survey 723 hectare, IP survey 113 linear m,
Geological mapping conducted	404 hectare geological mapping, 154 km recon route

Main information

Mining and drilling works conducted	Trench 816 m ³ , Core drilling 6706 linear meters
Laboratory analyses conducted	3,469 chemical analyses, 160 spectral analyses, and 1 metallurgical beneficiation test.
Expenditure incurred for exploration	1.3 Billion ₮
Invested capital	1.4 Billion ₮
Seeking investment	15 Billion ₮
Investment form	JV
Geology and exploration work plan	In addition to the blocks identified in previous studies, new blocks containing gold resources will be delineated. The proven reserves will be mined, and a processing plant will be constructed. For this purpose, shallow exploration drilling (up to 200 m) will be carried out within the blocks identified from previous studies to distinguish potentially prospective zones. Additional geophysical surveys up to 300 m depth will also be conducted.

ZAGIIN KHAR UUL

Mineral Primary gold deposit
Owner Erel LLC
License number MV-014850
Location Khovd province, Bulgan soum.
Resource, Reserve N/A

General information

Deposit type	Primary gold deposit
Age of license	9th year
State-funded geological exploration	None
Geophysical surveys conducted	3 times conducted
Geological mapping conducted	Yes

Basic information

Mining and drilling works conducted	Drilling works were conducted in 2008, 2012, 2018, 2019 and 2024.
Laboratory analyses conducted	Every year
Expenditure incurred for exploration	0.29 Billion ₮
Invested capital	2.9 Billion ₮
Seeking investment	3.5 Billion ₮
Investment form	Sale
Geology and exploration work plan

TAISHIR

Mineral Lithium
Owner Bakunatur LLC
License number XV-017883
Location Govi-Altai Province, Taishir soum.
Resource, Reserve

Category	Classification	Ore	Mineral
Resource	P		Lithium oxide 18 thous.ton

General information

Deposit type	Sedimentary
Age of license	2026
State-funded geological exploration	1:200 000 geo.mapping in 1983- 1986, 1:50 000 geo.mapping in 1999-2001
Geophysical surveys conducted	Magnetic Survey and IP survey
Geological mapping conducted	1:10 000 geological mapping

Main information

Mining and drilling works conducted	7 drill holes
Laboratory analyses conducted	ICP 33
Expenditure incurred for exploration	1 Billion ₮
Invested capital	
Seeking investment	1.25 Billion ₮
Investment form	JV and Sale
Geology and exploration work plan	Geochemical sampling and drilling

Contact

Name	Gunbileg.G
Position	Manager

SONDUULT

Mineral Manganese
Owner Universal Logging LLC
License number XV-022605
Location Uvurkhangai province, Taragt and Khairkhandulaan soums.
Resource, Reserve

Category	Classification	Ore	Metal
Resource	P		Iron 60 mil.ton Manganese 6 mil.ton

General information

Deposit type	Sedimentary, Alteration
Age of license	2nd year
State-funded geological exploration	N/A
Geophysical surveys conducted	N/A
Geological mapping conducted	N/A

Main information

Mining and drilling works conducted	N/A
Laboratory analyses conducted	Chemical
Expenditure incurred for exploration	0.65 Billion ₮
Invested capital	2.5 Billion ₮
Seeking investment	6 Billion ₮
Investment form	JV, Loan, Equipments, Sale, Other
Geology and exploration work plan	Increase reserve

UKHAA

Mineral Zinc
Owner Munkhsayan LLC
License number MV-021794
Location Dornogovi province, Dalanjargalan soum.
Resource, Reserve

Category	Classification	Ore	Metal	
Resource	P	6.3 Million ton		
Reserve	C	12.2 Million ton	Zinc	46.7 thous.ton
			Lead	22.7 thous.ton
			Silver	61.1 ton
			Cadmium	228.7 ton

General information

Deposit type	Vein type
Age of license	Valid until 2051
State-funded geological exploration	1:50 000 geological mapping
Geophysical surveys conducted	IP survey
Geological mapping conducted	1:10 000

Main information

Mining and drilling works conducted	1,500 linear meters drilled. Trenching conducted
Laboratory analyses conducted	Samples submitted to the laboratory.
Expenditure incurred for exploration	419 Million ₮
Invested capital	441 Million ₮
Seeking investment	900 Million ₮
Investment form	JV
Geology and exploration work plan	Additional deep drilling to increase reserves

ULGII TSAGAAN

Mineral Silica
Owner Monzol LLC
License number MV-022162
Location Dundgovi province, Saikhandulaan soum

Resource, Reserve

Category	Classification	Ore	Mineral
Reserve	B+C	440.9 thous.ton	Silica 425.7 thous.ton

General information

Deposit type	Vein type
Age of license	Valid until 2052
State-funded geological exploration	1:50 000 geological mapping
Geophysical surveys conducted	Magnetic Survey-500 km, IP survey
Geological mapping conducted	1:50 000

Main information

Mining and drilling works conducted	1056.3 m
Laboratory analyses conducted	67 core samples; samples for metallurgical testing, radiometric analysis, mineralogical and petrographic studies
Expenditure incurred for exploration	609 Million ₮
Invested capital	1 Billion ₮
Seeking investment	10 Billion ₮
Investment form	JV, Equipment, Sale and other
Geology and exploration work plan	Revise block model

KHUTUL-1, KHUTUL-2

Mineral	Limestone
Owner	Cement shokhoi LLC
License number	MV-012219, MV-015249
Location	Selenge province, Saikhan and Orkhon soums
Resource, Reserve	

Category	Classification	Mineral	
Resource	P	Limestone	48.4 mil.ton
Reserve	B+C	Khutul-1 limestone	16.8 mil.ton
		Khutul-2 limestone	31.2 mil.ton

General information

Deposit type	Sedimentary
Age of license	MV-012219 until 2037 MV-015249 until 2039
State-funded geological exploration	250 Million ₮
Geophysical surveys conducted	Aerial geophysical work
Geological mapping conducted	Geological mapping scale at 1:50 000 in 1990-1992

Main information

Mining and drilling works conducted	Drilling was conducted primarily at an inclined angle of 60° with water cooling, to depths ranging from 54.1 m to 210.2 m. A total of 89 holes were drilled, amounting to 10,794.6 m of core drilling. Core recovery exceeded 94.54%. The exploration holes were drilled with a diameter of 89.9 mm (HQ). Drilling operations were carried out from July 9 to late November 2014.
Laboratory analyses conducted	The quality assessment of the main part of the deposit was carried out based on semi-industrial tests and laboratory analyses conducted at Khutul "Cement-Lime" JSC. During the 2014 exploration, a total of 89 holes at the Khutul-1 deposit and over 3,270 samples were analyzed in the laboratory. Chemical analyses of all sampled drill cores were performed for 11 parameters, including determination of oxides, while the variability of limestone components was calculated and the average content was composited at the sample level..

Expenditure incurred for exploration	5.5 Billion ₮
Invested capital	
Seeking investment	5 Billion ₮
Investment form	JV, Loan, Equipment, Sale and other
Geology and exploration work plan	Since no further exploration or reserve updates have been carried out since the 2014 exploration, additional exploration work is required.

TSAGAAN CHULUUT

Mineral Placer gold deposit

Owner Zaamar gold LLC

License number MV-012439, MV-000213

Location Bulgan province, Buregkhangai soum, 250 km from Ulaanbaatar

Deposit reserve /As of 1st of January 2025/

Category	Classification	Placer sand	Metal
Geological	B+C	14.06 thous.m3	Gold 17.06 kg
Mineable	B'	161.34 thous.m3	Gold 124.34 kg

General information

Power source	Central Power System
Annual power consumption	355 thous kWh
Water source	Groundwater (seepage, well)
Water consumption	10.7 thousand m ³ /year
Feasibility study	Yes
Deposit Currently in Operation	No

Main information

Mine life	2 years
Annual capacity	100 thous.m3 sand with gold
Product output	124.34 kg
Invested capital	4.96 Billion ₮
Required investment	5 Billion ₮
Investment expenditure	Technics Equipments 3.6 Billion ₮ Other 1.4 Billion ₮
Sales revenue	17.67 Billion ₮
NPV@10%	4.6 Billion ₮
IRR	55%
Investment payback period	1 years
Investment form	Other

INDERT, KHUURAI SALAA

Mineral Placer gold deposit
Owner Burkit Corporation LLC
License number MV-013904, MV-006242
Location Bayan-Ulgii Province, Bulgan soum, 3-4 km from the deposit to the washing facility.

Deposit reserve / As of 1st of January 2025/

Category	Classification	Placer sand	Metal/element
Geological	B+C	478.6 thous.m3	Gold 342 kg

General information

Power source	Self-supplied power (generator)
Annual power consumption	
Water source	Surface water (river, stream, lake, pond)
Water consumption	
Feasibility study	No
Deposit Currently in Operation	No

Main information

Mine life	10 years
Annual capacity	140 thous.m3
Product output	
Invested capital	0.3 Billion ₮
Required investment	6.7 Billion ₮
Investment expenditure	Equipments
Sales revenue	38 Billion ₮
NPV@10%	
IRR	
Investment payback period	5 years
Investment form	JV

TSAGAAN CHULUUT KHUDAG

Mineral Placer gold deposit
Owner Pro Aurum LLC
License number MV-021092
Location Dornod province, Bayandun soum, 200 km from Choibalsan city.
Deposit reserve / As of 1st of January 2025/

Category	Classification	Placer sand	Metal/element
Geological	B+C	103.5 thous.m ³	Gold 85.1 kg
Mineable	B'	110.0 m ³	Gold 85.1 kg

General information

Power source	Power generator
Annual power consumption	15 thous kWh
Water source	Artificial lake
Water consumption	20 milliom m ³ /years
Feasibility study	Yes
Deposit Currently in Operation	No

Main information

Mine life	3 years
Annual capacity	18 thous.m ³ sand with gold
Product output	Gold 73.2 kg
Invested capital	2 Billion ₮
Required investment	2 Billion ₮
Investment expenditure	Dewatering of the quarry is necessary due to water accumulation 0.6 Billion ₮ Topsoil stripping 1.4 Billion ₮
Sales revenue	7.5 Billion ₮
NPV@10%	2 Billion ₮
Investment payback period	1.5 years
Investment form	Loan

Power consumption	7,348.7 thous.kWh
Water source	Groundwater (seepage, well)
Water consumption	5000 thousand m ³ /year
Feasibility study	Yes
Deposit Currently in Operation	No

Main information

Mine life	10 years
Annual capacity	
Product output	4.8 Million ton iron concentrate
Invested capital	5 Billion ₮
Required investment	47.4 Billion ₮
Investment expenditure	Equipments Construction Processing plant
Sales revenue	727.62 Billion ₮
NPV@10%	21.7 Billion ₮
IRR	
Investment payback period	4 years
Investment form	JV, Sale

TSAGAAN CHULUUT

Mineral Limestone

Owner Davaat LLC

License number MV-017220

Location Bayan-Ulgii Province, Sagsai soum, 23 km from the provincial center, 5 km from the center of Sagsai soum

Deposit reserve /As of January 1, 2025/

Category	Classification	Limestone
Geological	B+C	3.25 mil.ton
Mineable	B'	2.34 mil.ton

General information

Power source	Western Regional Power System
Annual power consumption	15 thous.kWh
Water source	Groundwater (seepage, well)
Water consumption	3-5 thousand m ³ /year
Feasibility study	Yes
Deposit Currently in Operation	No

Basic information

Mine life	18 years
Annual capacity	100 thous.ton cement
Product output	Yearsд 100-300 thous.ton cement
Invested capital	7 Billion ₮
Required investment	25 Billion ₮
Investment expenditure	Equipments-18 Billion ₮ Construction 12-14 Billion ₮
Sales revenue	45 Billion ₮
NPV@10%	4 Billion ₮
IRR	15%
Investment payback period	6 years
Investment form	JV, Sale

TUV-ULZIIT

Mineral Limestone

Owner GRTB LLC

License number MV-020474

Location Dundgovi Province, Undurshil soum, 90 km from Choir station

Deposit reserve /As of January 1, 2025/

Category	Classification	Limestone
Geological	B+C	136.9 mil.ton

General information

Power source	Not in use
Annual power consumption	Not estimated
Water source	Dewatering
Water consumption	Not estimated
Feasibility study	No
Deposit Currently in Operation	No

Main information

Mine life	21 years
Annual capacity	460–550 thousand tons of limestone (according to the previous Feasibility Study, 2015)
Product output	Lime MNS 347:2002 (1st grade lime) Crushed limestone: 450 thousand tons
Invested capital	2 Billion ₮
Required investment	20 Billion ₮
Investment expenditure, бүтэц	Equipments 17 Billion ₮ Construction 7 Billion ₮
Sales revenue	13.7 Billion ₮
NPV@10%	4.3 Billion ₮
IRR	36.8%
Investment payback period	2.6 years
Investment form	JV, Sale

BILUUT

Mineral Limestone

Owner Erel LLC

License number MV-001774

Location Dornogovi Province, Dalanjargalan soum, 17 km from Railway Siding No. 25, and 30 km from Dalanjargalan soum center.

Deposit reserve /As of January 1, 2025/

Category	Classification	Limestone
Geological	B+C	65.9 mil.ton
Mineable	B'	25.6 mil.ton

General information

Power source	Not in use
Annual power consumption	12 km from the nearest railway at Ölziit siding, with high-voltage power supply
Water source	Groundwater (seepage, well)
Water consumption	Currently - N/A
Feasibility study	Yes
Deposit Currently in Operation	No

Main information

Mine life	51 years
Annual capacity	500 thous.ton limestone
Product output	500 thous.ton
Invested capital	1 Billion ₮
Required investment	3.5 Billion ₮
Investment expenditure	Equipments Construction Other
Sales revenue	1 Billion ₮
NPV@10%	1 Billion ₮

KONECRANES

25.015.01

BENEFICIATION AND PROCESSING PLANT PROJECTS

KHAR CHULUUT

Mineral	Graphite
Owner	Borolzoi LLC
License number	MV-021752
Location	Dundgovi Province, Erdenedalai soum, 300 km from Choir station
Project objective	Establish a beneficiation and processing plant based on the gypsum deposit and prepare it for mining

General information

Power source	Central Power System
Annual power consumption	261 thous.kWh
Water source	Depth (spring and well)
Operating life	15
Feasibility study	No
Status of production	No

Main information

Annual production capacity	468 thous.m3
Raw material supplying mine and plant	
Product output	64.8 thousand tons of gypsum concentrate
Invested capital	0.1 Billion ₮
Required investment	9.8 Billion ₮
Investment expenditure	Equipments, electric power network and other-7.4 Billion ₮ Construction-0.8 Billion ₮ Technics-1.5 Billion ₮
Sales revenue	3.2 Billion ₮
NPV@10%	3.2 Billion ₮
Investment payback period	5 years
Investment form	JV, Sale

GOVI ARGATAI

Mineral	Fluorspar
Owner	Govi Argatai Development LLC
Location	Dundgovi Province, Bayanjargalan soum, 80 km from Choir station
Project objective	To process fluorspar, producing value-added export products.
General information	

Power source	Central Power System
Annual power consumption	60 thous.kWh
Water source	Depth (spring and well)
Operating life	5 years
Feasibility study	Yes
Status of production	No

Main information

Annual production capacity	400 thous.ton Ore
Raw material supplying mine and plant	Mines and cooperatives located 7–25 km within the territory of Bayanjargalan soum, Töv Province
Product output	Fluorite concentrate
Invested capital	4 Billion ₮
Required investment	8 Billion ₮
Investment expenditure	Equipments Construction
Sales revenue	28.68 Billion ₮
NPV@10%	11 Billion ₮
Investment payback period	5 years
Investment form	JV

UMNUD ALTAD

Mineral	Fluorspar
Owner	Kherlen Impex LLC
License number	MV-013223
Location	Dornogovi Province, Airag soum, 10 km by road to Airag station, and 370 km from Airag station to Zamyn-Uud.
Project objective	To build a mining, processing, and beneficiation plant.
General information	

Power source	Central Power System
Annual power consumption	1,294.0 thous.kWh
Water source	Depth spring and well
Operating life	5 years
Feasibility study	Yes
Status of production	Yes

Main information

Annual production capacity	150 thous.ton Ore
Raw material supplying mine and plant	Khokh Jons LLC Dongfanglunma LLC Eklishya LLC
Product output	Fluorite concentrate 98%
Invested capital	
Required investment	2 Billion ₮
Investment expenditure	Equipments
Sales revenue	
NPV@10%	
Investment payback period	3 years
Investment form	JV, Equipments, Sale

SHOKHOIT

Mineral Limestone
Owner Shim construction LLC
License number MV-003205
Location 15 km from Khutul station, Saikhan soum, Selenge province
Project objective Processing limestone to produce lime and other products.

General information

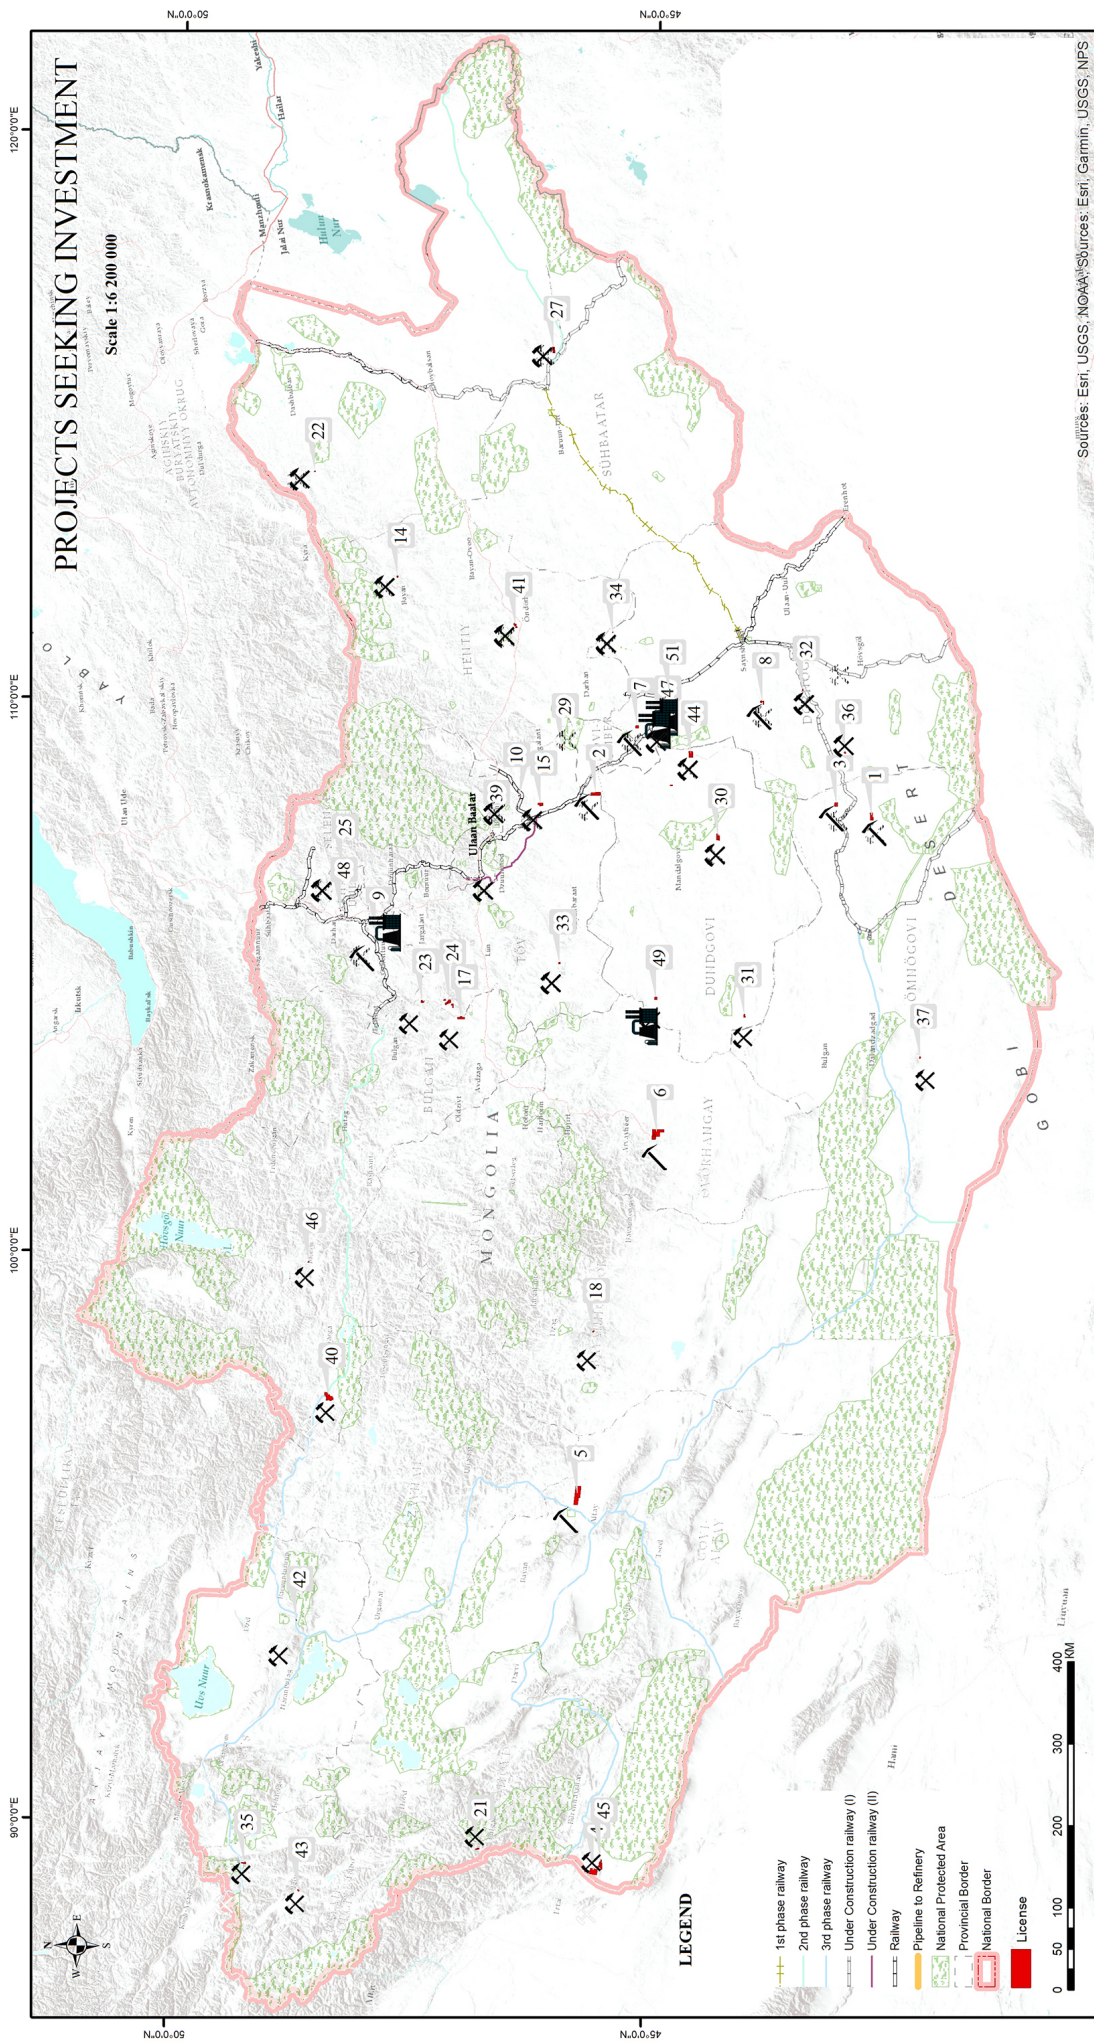

Power source	Central Power System
Annual power consumption	10.4 thous kWh
Water source	Transport
Operating life	40 years
Feasibility study	No
Status of production	No

Main information

Annual production capacity	10 thousand tons of lime 3 thousand tons of mineral powder
Raw material supplying mine and plant	Limestone mine owned by the company, open-pit and/or underground.
Product output	Limestone 400 thous.ton
Invested capital	4 Billion ₮
Required investment	2 Billion ₮
Investment expenditure	Equipments 1.5 Billion ₮ Operation 0.5 Billion ₮
Sales revenue	3 Billion ₮
NPV@10%	2 Billion ₮
Investment payback period	2 years
Investment form	JV, Other
